The increased provision of ₹8,500 in the Industrial School Budget Estimates for 1904 - '05 for purchase of materials, at the rate of ₹1,000 each for eight Industrial Schools and ₹500 for the Carpentry School at Holenarsipur, may be sanctioned The amount will be recouped from the sale of the manufactured articles The Comptroller is not in favor of giving an imprest to each school, and Mr. Bhabha also considers that it introduces complications The Councillors are in favor of granting the increase.

SIR,

I have the honour to state that in the current year's Budget Estimates of the Industrial and other Special Schools no provision has been made for the purchase of working materials required for the new Industrial Schools, the monthly Establishment charges and the metal cost only having been provided. The cost of materials during the current year has however been sanctioned by Government from savings in the Establishment charges and the metal cost which have been caused by these schools having been started rather late in the year. The supply of materials such as timber, iron, yarn will in the case of these Industrial Schools be an annually recurring charge, and as the schools are practically under the control of the Education Department, it becomes necessary to supply them with the materials

They work with at the cost of Government These materials and the articles made of them subsequently will however be the property of Government and when the latter are sold the money realised will be paid into the public treasuries to the credit of the Local Funds General from which they are supported. It will thus be incumbent on these schools to repay to Government whatever money is granted to them for purchasing materials Under these circumstances I request that Government may be pleased to sanction in the Budget for 1904-05 a provision of Rs 8500 for the purchase of materials, at the rate of Rs 1000 for each of the eight schools named in the margin which have been sanctioned, and Rs 500 for the Hole-Narsipur Carpentry School

SIR,

With reference to your docket No 6145 of the 4th instant, I have the honour to inform you that, as an imprest is of the nature of an advance which must be fully and readily recovered, it is feared that in Industrial Schools the whole of the amount advanced for materials may not be recovered from sale proceeds, as first, most of the Industrial Schools have been newly established and the Superintendents have to acquire experience in the management, secondly, beginners learning a new trade must waste material and cause loss by bad workmanship, thirdly, on account of plague, or other reasons articles manufactured may not find a ready sale, though every effort will be made to manufacture only readily

Agreable, articles, and fourthly there is a certain amount of risk in entrusting a large sum of Rs1000/- to the Superintendent as an imprest Under these circumstances the sale proceeds of manufactured articles may as at present be credited to Government, and after a trial of a year or two it may be seen how much of the cost of materials is actually recovered as sale proceeds Under these circumstances I recommend that the provision for the purchase of materials may remain in the budget as at present

SIR,

With reference to your no 6467 dated 24th instant requesting me to state whether an annual provision for the cost of materials required for certain industrial schools is really necessary and whether an imprest in each case will not be sufficient for the purpose, I have the honour to state that the system of recouping imprests from the sale proceeds of manufactured articles is opposed to all account principles. Moreover there is the risk of stopping all further work when the imprest is exhausted and no money is realised for want of sale of manufactured articles. In the case of the Mysore Artware Co, Industry the system did not work satisfactorily even though funds were supplied not by a limited imprest but by

by means of letters of credit (Vide para 9 G O No 91 $\frac{1150-1192}{18-1901-02}$ dated 7 Feb 1903)

The procedure in question will also be opposed to the fundamental rule that departmental receipts should not be utilized for departmental expenditure and this procedure has already been condemned by the government in another case, (Vide para 58 of the same Government Order.

In these circumstances, I am of opinion that a separate Budget provision is necessary for the purchase of materials and that all realizations by the sale of articles manufactured should be credited to Local Funds General to which the charges on account of Industrial Schools are debited

I have the honour to remain,
